

padmax

FOR MAINTANANCE
OF PADEL COURTS

Unique design

Padmax VX2 is developed with passion and commitment. Our engineers have delivered maximum efficiency and design and every part has been considered carefully.

Innovation

The Padmax VX2 is unique and a true innovation. It is the first really efficient tool for redistribution of sand on padel turfs.

Sustainability

Sustainability is one of our main commitments. With no emissions and by choosing environmentally friendly materials and techniques we can help save our planet.

Game experience

Designed and developed to deliver a level of game experience not reached before.

Only 20 minutes to prepare one court

With Padmax VX2 you will prepare a court in less than 20 minutes.

Secure the padelcourt lifetime

With frequent use of the Padmax VX2 you will prevent unnecessary wear of the artificial turf. This will help keeping its expected lifetime.
